QUICK START GUIDE
DSP100 SOLAR PANEL

LET'S GET STARTED

Power up – The DSP100 is compatible with all Duracell Portable Power Stations. Depending on the model, a connection cable (included) may be required.

POWER 300 – Use the connection cable (included) to connect the solar panel to the **DC-in port**, use **plug B** (smallest diameter DC4017)

POWER 500 – Use the connection cable (included) to connect the solar panel to the **DC-in port**, use **plug C** (larger diameter DC8020)

POWER 1000 – Connect the solar panel directly into the **Anderson port using plug A** (no cable needed) **or** use the connection cable (included) to connect to the **DC-in port**, use **plug D** (smaller diameter DC6530)

Follow the sun – for best results, continuously realign with the sun.

KEEP DRY

Duracell Solar Panels can withstand water splashes and light rain when set up with the cell surface up. Backside fabrics are not waterproof and contact with water should be avoided. Do not leave your Solar Panels in the rain. Do not immerse in water.

KEEP CLEAN

Use a damp cloth to gently wipe the surface, do not use any chemicals or corrosive products. Do not immerse in water. A soft brush can be used to remove any loose dirt.
